Dear Harry,

A belated thank you for your kindness in copying William Lear's personal memoir. I enjoyed reading it, especially the tribute to Lee. As I read that section, I recalled Lee had mentioned receiving it, that he had been very pleased to be included. I remembered as soon as I saw the word, "sullied."

As for my letter to Rufus, Rufus wrote me that Lee mentioned including me on property, and I am sure you will let me know when you come across my name. I am hopeful as Lee always had so much integrity and his word meant *everything to him*. I had heard the same of you from Lee's friend, Ed Hogan. In the meantime, a title search is or will be underway and I hope that will disclose something. Because of living in Las Vegas, I will have to ask for help in the search.

If you ever do come across my MRI report, please just shred it up. I have decided not to follow up on the small tumor as I have had it for years.

Oh – I meant to ask you if you recommend your lift up the stairs, and if so if you could let me know what company or model that it is so I would have some insight for a possible purchase.

I hope you and Mildred are both doing well.
